Kawasaki Motors USA Recalls Lawn Mower Engines Due to Burn ...

Folks I have a John Deere LX 176 lawn tractor with a Kawasaki 14 HP engine in it. The engine starts perfectly and I can drive the mower about a 100 feet and it will die and not start. You can crank and crank and it will not start. Let it cool for a minute and it will start right up and run the rest of the day with no problems.

Kawasaki 14 HP Engine Problems - Houzz

The way a mower engine works, the spark plug sparks, creating an ignition source, which is the driving force to get your engine to run, no spark=no power. Usually, when you turn off the key of your lawn mower it shuts the engine off, but other times you may need to resort to removing the spark plug wire to get your engine to stop running.

Most Common Lawnmower Engine Problems

Until this engine gets resolved by Deere, I have to warn people.. don't buy any mower with the Kawasaki 20 hp air cooled engine at this time unless they do a recall on the others, taking responsibility and actually fixing the problems.

Lawn mower engine surging is a right pain in the Jacksie, it's an engine that runs erratically, revs up and down by itself uncontrollably. In some cases it may only happen under certain conditions, for example only after the mower gets hot, or only when the fuel level gets low.

Lawn Mower Engine Surging | Lawnmowerfixed

Solution: You can take your mower to a small engine repair shop to have the carburetor removed and cleaned. However, if you're comfortable with your repair skills, then here are the steps you should take: Disassemble the carburetor. For you to reach the carburetor, you're likely to have to disconnect the air filter, fuel tank, governor control link, breather pipe, and manifold seal and ...

4 Things to Troubleshoot in a Lawn Mower For Surging Engine

One type of backfire that occurs in a 23 HP Kawasaki engine is caused by improper ignition timing. The combustion cylinder's fuel intake valve opens to take in a fuel/air mixture from the carburetor. The ignition timing is off, resulting in engagement of the spark plug before the intake valve closes, igniting all the fuel in the cylinder, as well as all the fuel in the manifold leading down ...
