Private wells are wells that are not part of a public water supply. Private wells have fewer than 15 connections and serve fewer than 25 people. They are usually wells that serve a single home or farmhouse. Unlike public water systems, protection and maintenance of a private well is largely the responsibility of homeowners.

Information for private well owners | Wisconsin DNR

WATER WELL BASICS A water well is a hole, shaft, or excavation used for the purpose of extracting ground water from the subsurface. Water may flow to the surface naturally after excavation of the hole or shaft. Such a well is known as a flowing artesian well. More commonly, water must be pumped out of the well.

Water wells in unconfined aquifers are known as water-table wells. The water level in these wells is the same as the surrounding aquifer. A pump is used to bring water to the surface for use. Water wells in confined aquifers are known as artesian wells. Pressure causes the water level to rise in the well to an elevation higher than the water

New Domestic Well Prohibition in ... - Schroeder Law Offices

Most manual well drilling methods have been adapted to use machine power instead of human power. Also, powered methods have been developed that can drill larger diameter boreholes much deeper and faster than any manual method. Machines used to drill a water well are typically called a "drill rig" or just a "rig". Jetting
