Weaning Nhs Grampian
Weaning is a time for babies to learn to enjoy food. It is also a time to think about the balance of foods for your baby's health now and in the future. The foods your baby learns to eat now can have a big impact on how healthy a child and adult they become. The supporting leaflet "Weaning - What foods? When? How much?" will also help you.

Weaning - NHS Grampian
Full fat cows milk products can be used in weaning after 6 months (e.g. yoghurt, custard, cheese sauce). 500-600ml breast milk, infant milk or follow-on milk daily. Can also use full fat cows milk to mix solids. Hard cheese can be cubed or grated & used as 'finger food'. Bread, cereal, rice, pasta and potatoes

6 months 12 months - NHS Grampian - Caring
Introducing your baby to solid foods, also referred to as weaning or complementary feeding, starts when your baby is around 6 months old. Your baby should be introduced to a varied diet, alongside their usual breast milk or first infant formula. It can be confusing knowing when and how to start introducing solid foods.

Goat, sheep, soya, coconut, lactofree, oat and nut milks. Non formula milks such as goat's, sheep's, soya, coconut, lactofree, oat and nut milks should not be used in infants under 12 months as a main drink due to their low iron and other nutrients. After one year of age they can be given if pasteurised.
