The Origin of Humankind Summary - eNotes.com

Louis Leakey and his son Richard were instrumental in shifting the focus of human origins to the Great Rift Valley of East Africa.

Where Is the Birthplace of Humankind? South Africa and ...

Human evolution is the evolutionary process that led to the emergence of anatomically modern humans, beginning with the evolutionary history of primates—in particular genus *Homo*—and leading to the emergence of *Homo sapiens* as a distinct species of the hominid family, which includes the great apes. This process involved the gradual development of traits such as human bipedalism and language ...

The Origin Of Humankind by Richard Leakey, Paperback ...

The second revolution was the origin of multicellular organisms, about half a billion years ago. Life became complex, as plants and animals of myriad forms and sizes evolved and interacted in fertile ecosystems. The origin of human consciousness, some time within the last 2.5 million years, was the third event.
